Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to communications: original application filed 12/21/1999.
2. Claims 1-45 are currently pending in this application. Claims 1-2, 5, 9, 11, 16-17, 20, 24, 26, 31-32, 35, 39 and 41 are independent claims.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 16-19, and 31-34 drawn to an automated method for designating text from a set of citing documents, classified in class 704, subclass 4.
 - II. Claims 5-8, 20-23, and 35-38 drawn to an automated method for selecting content words from document, classified in class 715, subclass 501.1.
 - III. Claim 9-10, 24-25, and 39-40 drawn to an automated method of finding different morphological forms of a word, classified in class 704, subclass 7.
 - IV. Claims 11-15, 26-30, and 41-45 drawn to an automated method of scoring sentences in a citing document, classified in class 704, subclass 9.
4. The inventions are distinct, each from the other because of the following reasons:
 - Inventions I and II are related as combination and subcombination. Invention in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

Art Unit: 2176

case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination is for selecting content words from document and determining content scores for respective content words that indicate the content words' degree of relevance. The subcombination has separate utility such as forming the content word list as including the common words linked to respective content scores.

- Inventions I and III are related as combination and subcombination. Invention in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination is for finding different morphological forms of a word. The subcombination has separate utility such as stemming the word by eliminating any letters after the Nth letter from the beginning of the word.

- Inventions I and IV are related as combination and subcombination. Invention in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination is for scoring sentences in citing documents. The subcombination has separate utility such as calculating respective content score for the sentences in the citing documents, based on at least the ICSs and the distances.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III or Group IV, restriction for examination purposes as indicated is proper.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maikhanh Nguyen whose telephone number is (703) 306-0092. The examiner can normally be reached on Monday - Friday from 9:00am – 5:30 pm.
